

Download 18 2 Modern Evolutionary Answers

A few years ago, I was giving an invited presentation to an audience of mostly sociologists and family studies professors on the topic of evolution and human reproductive strategies. I mentioned that some social scientists hold false beliefs about “evolutionary psychology,” such as the mistaken assumption that evolutionary psychology is a theoretical approach in the social and natural sciences that examines psychological structure from a modern evolutionary perspective. Evolutionary biology is the subfield of biology that studies the evolutionary processes that produced the diversity of life on Earth, starting from a single common ancestor. Evolutionary psychology claims to be the authoritative science of “human nature.” Its chief architects, including Stephen Pinker and David Buss, have managed to reach well beyond the ivory tower to win large audiences and influence public discourse.
