The idea of recapitulation was first formulated in biology from the 1790s onwards by the German natural philosophers Johann Friedrich Meckel, Étienne Serres, and Carl Friedrich Kielmeyer, after which, Marcel Danesi states, it soon gained the status of a supposed biogenetic law. (Compiled by G. Read, 1997-2000) The status of members of Phylum Annelida and related phyla has been under scrutiny. Membership of Annelida has varied since its inception as a group emerging from the Vermes in the early 19th century. Cladistics (/ k l ? ? d ? s t ? k s /, from Greek ??????, cládos, "branch") is an approach to biological classification in which organisms are categorized in groups ("clades") based on the most recent common ancestor.
