

# **Download China Asia And The New World Economy**

Economic reforms started with the initial focus on collectivizing agricultural activities in the country. The leaders of the Chinese economy, during the 1970s and 1980s, were trying to change the centre of agriculture from farming to household activities. Latest news and information from the World Bank and its development work in China. Access China's economy facts, statistics, project information, development research from experts and latest news.
