

Download Digital People From Bionic Humans To Androids

Bionic Physiology Victor Mancha (Marvel Comics) gained a bionic physiology from his creator, Ultron. An android is a robot or other artificial being designed to resemble a human, and often made from a flesh-like material. Historically, androids were completely within the domain of science fiction and frequently seen in film and television, but recent advances in robot technology now allow the design of functional and realistic humanoid robots. Artificial Humans often have cognitive traits similar to The Spock, such as mathematical skill and a perfect memory on the positive side, they may be unemotional and on the negative side they may suffer from uncreativity and excessive literal-mindedness. Cyborgs: The truth about human augmentation - 24 September 2014 "What is it like to be a cyborg? In his last regular column for BBC Future, Frank Swain explores the biggest misconceptions about bionic limbs, microchip implants and beyond."
