

Download Fertilizer Use In Semi Arid Tropical India Pdf

A desert is a barren area of landscape where little precipitation occurs and, consequently, living conditions are hostile for plant and animal life. Through litter decomposition enormous amounts of carbon is emitted to the atmosphere. Numerous large-scale decomposition experiments have been conducted focusing on this fundamental soil process in order to understand the controls on the terrestrial carbon transfer to the atmosphere. Dr. Hans P. Binswanger-Mkhize was born in 1943 in Kreuzlingen, Switzerland. He earned his M.S. in Agricultural Sciences from the Eidgenössische Technische Hochschule in 1969 and his Ph.D. in Economics from North Carolina State University in 1973. Agriculture is the cultivation of land and breeding of animals and plants to provide food, fiber, medicinal plants and other products to sustain and enhance life. Agriculture was the key development in the rise of sedentary human civilization, whereby farming of domesticated species created food surpluses that enabled people to live in cities.
