A hulking brute of an aircraft, the Javelin suffered a convoluted development period masquerading as a full introduction to RAF service, and did not truly live up its design specs until no less than 7 different variants had been produced. The Gloster Gamecock was a biplane fighter of the Royal Air Force, a development of the Mk III Grebe, that first flew in February 1925. It differed from the Grebe primarily by way of its Bristol Jupiter engine, which replaced the unreliable Armstrong Siddeley Jaguar.
