

Download Journals Of Epidemiology Impact Factor

Impact factor of OMICS journals is calculated by dividing the sum of articles published in two consecutive years with the number of times it is cited. Our policy towards the use of cookies All Clarivate Analytics websites use cookies to improve your online experience. They were placed on your computer when you launched this website. Five-Year Impact Factor: While the standard Impact Factor measures citations to journal articles published within a 2-year period, the 5-year Impact Factor evaluates citations to journal articles published within a 5-year period to provide a measure of a journal's longer-term influence. Impact Factor of Epidemiology And Infection, 0950-2688, Journal Impact Factor report
