Introduction. Guiding the behavior of young children involves establishing mutual respect and expecting cooperation. Effective discipline is positive and child focused. Guides for applicants, webinars, one-to-one phone calls and more are available to help you apply for funding. At the beginning of the twentieth century, the sterilisation of people carrying what were considered to be hereditary defects and in some cases those exhibiting what was thought to be hereditary "antisocial" behaviour, was a respectable field of medicine. Who should get these vaccines? All children, beginning at age 2 months, and adults need protection against these three diseases—diphtheria, tetanus, and pertussis (whooping cough).
