

# Download Managing Native Broadleaved Woodland

Biodiversity Design. The majority of new woodland should be made up of native species but can include a proportion of non-native or advancing/honorary species: Williams Well Wood, Devon - About 2 ½ acres, £25,000. Sigford, Ashburton, Devon. An intriguing mature broadleaved woodland with historical mining features and good access links to Dartmoor National park. Riddle Wood, Devon - About 4 ? acres, £43,000. Cheriton Bishop, Near Exeter, Devon. A highly varied and attractive woodland with a stream and useful forestry shelter set beneath broadleaved trees and mature conifers. COUNTRYSIDE TRAINING PARTNERSHIP Ltd State of the AONB Report Cannock Chase AONB March 2010
