

Download On Call X Rays Made Easy

Overview. The biopsies done at Sugar Mill Diagnostic Imaging are performed by the radiologist. A needle biopsy is a sample of tissue or fluid. This procedure is referred to as a fine-needle aspiration biopsy. X-Ray Scanning. X-Rays are scanned and converted into high quality digital files. Common formats include DICOM, JPG, or TIFF. Digital files can easily be viewed on any PC, imported, exported, emailed or printed for exhibits. What are X-rays of the extremities? X-rays use invisible electromagnetic energy beams to make images of the bones, and surrounding soft tissues. Standard X-rays are done for many reasons, including diagnosing tumors, infections, foreign bodies, or bone injuries. X-rays are made by using external
