

Download Paediatrics And Neonatology In Focus

The In Focus series are useful 'trigger texts' i.e. they give enough information so that you want to read further or continue your learning on the internet. The colours have been used nicely, with realistic print colours of patients, instruments and slides. The set out of the books are ideal with good, quick reference contents, making the series ideal for students in Clinics and/or ward rounds. Useful for medical and health science students who require an introductory, low cost and illustrated guide to Obstetrics. This is a convenient pocket size, and therefore is suitable for quick preparation before ward rounds. Note: Citations are based on reference standards. However, formatting rules can vary widely between applications and fields of interest or study.
