New trade theory (NTT) is a collection of economic models in international trade which focuses on the role of increasing returns to scale and network effects, which were developed in the late 1970s and early 1980s. Praise for the previous edition: "No other book in advanced international trade matches this one in providing a clear, complete, up-to-date, balanced, and systematic summary of international trade theory and evidence. Econometrics analyzes data using statistical methods in order to test or develop economic theory. These methods rely on statistical inferences to quantify and analyze economic theories by ... Econometrics (ISSN 2225-1146) is an international peer-reviewed open access journal on econometric modeling and forecasting, as well as new advances in econometrics theory, and is published quarterly online by MDPI.
